

AMENDMENT TO THE CLAIMS

Cancel claim 27 and amend claim 13.

1-9. (Cancelled)

10. (Previously presented) A method for treating a human with a stimulant dependency, said method comprising administering to said human a therapeutically effective amount of pramipexole and a therapeutically effective amount of an antidepressant, wherein said pramipexole is administered intranasally.

11. (Previously presented) A method for treating a human with a stimulant dependency, said method comprising administering to said human a therapeutically effective amount of pramipexole and a therapeutically effective amount of an anticonvulsant, wherein said pramipexole is administered intranasally.

12. (Previously presented) A method for treating a human with a cocaine craving dependency, said method comprising administering to said human a therapeutically effective amount of pramipexole and a therapeutically effective amount of an antidepressant, wherein said pramipexole is administered intranasally.

13. (Currently amended) A method for treating a human with a cocaine craving dependency in a human, said method comprising administering to said human a therapeutically effective amount of pramipexole and a therapeutically effective amount of an anticonvulsant, wherein said pramipexole is administered intranasally.

14. (Previously presented) The method of claim 11 or 13, wherein said anticonvulsant is lamotrigine.

15-23. (Cancelled)

24. (Previously presented) The method of any one of claims 10-13, wherein said pramipexole is administered at a dose ranging from 1.5 mg/day to 6.0 mg/day.

25. (Previously presented) The method of claim 24, wherein said pramipexole is administered at a dose ranging from 1.5 mg/day to 4.5 mg/day.

26. (Previously presented) The method of claim 10 or 11, wherein said stimulant dependency involves a stimulant craving.

27. (Cancelled)
